"Paying Research 'Volunteers': Ethical and Regulatory Concerns"

12:00 p.m. – 1:00 p.m.
219 Brinkhous-Bullitt
TraCS Conference Rm

Compensating research participants has been the subject of national debate for some time. In this presentation, I will review the four most common approaches to paying research participants and critically evaluate the impact of these schemes with relation to the risk:benefit ratio in research. I will also present the growing empirical literature on the varying influence such compensation seems to have on potential subjects' willingness to participate in research.
